Lokeren, 26/05/2008

To whom it may concern;

The PIP Healthcare products from Chrisal are being successfully applied in the general hospital of Lokeren since 2006. The use of these products has been generalized towards all day-care and polyclinic units, as well as all administrative buildings.

The PIP Healthcare products result in the following advantages:

- better cleaning of surfaces in the hospital (visual dirt)
- less odour problems on sensitive units
- less pathogenic bacteria in the hospital
- decrease of hospital (nosocomial) contaminations and infections
- safe to skin and respiratory tract of the cleaning staff
- easy to use

No disadvantages have been observed due to the PIP Healthcare products.

Sincerely yours;

Koen Van Landeghem
Hospital hygienist
